## Security solutions for:

Shopping Malls

Food Courts

Airports

Railway Stations

Banking Halls

Bars

Room Dividers

Medical Centres

Educational Centres

Reception Areas

Service Stations

Restaurants

## Introduction

The Protectors Sliding Shutters are a flexible security solution for a large variety of openings. They are the best choice for wider openings, work very well in situations with limited headroom and are practically the only option for curves.

In this guide you will find:

- An overview of the benefits of The Protectors
- Technical information on the The Protectors range of sliding shutters
- Sample layouts
- Options for mounting the top track
- Details of locking posts
- A description of the model types you can choose from
- Technical drawings
- Specification texts

The Protectors Sliding Shutters will fit almost anywhere. Here, a long Protectors Classic Chainlink Sliding Shutter with a custom curve is installed below a suspended ceiling.

You will also find most of this information on

[www.theprotectors.com.pk](http://www.theprotectors.com.pk) from where you can also download a range of CAD-drawings and specification texts.

If you require any further information, please phone us on 0300 0341 003 , 021-111-BLINDS (111 254 637) or send an email to [sales@theprotectors.com.pk](mailto:sales@theprotectors.com.pk)  
We are always happy to answer any questions you may have.

## Benefits of The Protectors sliding shutters

The Protectors sliding shutters have a number of benefits over conventional roller shutters. They are versatile, elegant, refreshingly different, easy to maintain, work without a motor, and are user friendly.

- **Versatile**  
Usually fit anywhere a roller shutter fits and in many places where a roller shutter won't, such as:
  - areas with very limited headroom
  - very wide openings
  - curved openings
- **Elegant**  
Built from strong but lightweight aluminium framework, their simple and effective design makes sliding shutters a very elegant alternative to traditional roller shutters. Infill panels are available in perforated steel, slotted aluminium, polycarbonate, tempered glass and solid aluminium. Open grille arrangements are also available.
- **Refreshingly different**  
A fresh appearance in a world dominated by vertical roller shutters.
- **Easy to maintain**  
A minimum amount of parts, so very easy to maintain, saving you both time and expense.
- **No motor needed**  
Manually operated, no matter what size they are. Without electrics, site preparation is easier and safety is increased.
- **User friendly**  
A very neat and straightforward security solution that can be used by almost anyone with minimal training.

The Protectors Vision Air surrounds a three sided reception counter. The perforated curtain allows the area to be secure, but still allows excellent visibility and airflow.

The Protectors Classic Chainlink Sliding Shutter securing a bar at an airport. When opened, the shutter folds away completely and leaves the bar totally clear.
